Oleksii Y

ABOUT ME

Software Engineer with 6 years of experience in Software Development; deep knowledge in React Native, Redux, JS, TypeScript; strong analytical, troubleshooting, and problem-solving skills, ability to work independently, handle multiple tasks simultaneously and adapt quickly to changes; love interesting and saturated projects.

SKILLS

HARD SKILLS	HARD SKILLS
• React Native; • JS, TypeScript; • Swift/Java (native components); • React/Redux (React 18, Redux-Thunk, Redux-Saga); • React-Navigation, React Native Reanimated, WebRTC (video/audio calls); • GraphQL; • REST API; • Push/VoIP notifications, in-app purchases.	• App Store, Google play; • Firebase Crashlytics, TestFlight; • Jira SoftWare, Slack, Figma, Asana; • MixPanel, MoEngage, Google analytics, Sentry; • VScode; • Xcode; • Android Studio; • npm, yarn; • Git, github; • Bitbucket.

WORK EXPERIENCE

Project Description: Applications are designed for sports enthusiasts who want quick and comprehensive access to the latest match results across various sports. The app allows users to review detailed results from ongoing and past games, providing an easy way to stay updated on their favorite teams, players, and leagues. With real-time data and extensive coverage, this app delivers a complete sports results experience.

Customer: NDA

Involvement Duration: 05.2023–now

Project Role: *React Native Developer*

Responsibilities:
• Development apps from scratch;
• configuration for production;
• quick code writing.

Project Team Size: 9 team members

Tools & Technologies: React Native, TypeScript, REST API.

Project Description: This is a specialized job search application. The app is designed to streamline the process of finding and applying for job opportunities within the labor market, with a focus on positions related to some professions. It provides customers with personalized job recommendations, filtering options, and application tracking, making it easier to connect with potential employers.

Customer: NDA

Involvement Duration: 02.2022-05.2023

Project Role: *React Native Developer*

Responsibilities:
• Development app from scratch;
• Integration incoming purchases;
• Publishing to TestFlight and Play Market.

Project Team Size: 11 team members

Tools & Technologies: React Native, TypeScript, REST API, in-app purchases, Stripe.

Project Description: Security app that gives access to your home/residentials. It works like an intercom, but better, with more functionality. For example to answer on incoming video calls to give access from any places and phones, just need to have internet connection.

Customer: NDA

Involvement Duration: 01.2022-02.2022

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic;
• Integration incoming video calls;
• Project settings, publishing to TestFlight.

Project Team Size: 5 team members

Tools & Technologies: React Native (0.66), JavaScript, Java (native modules), Swift (native modules), Functionality programming (hooks), Firebase.

Project Description: Fitness app with multiple languages. This app has subscriptions, like internal purchases, and free subscriptions too. The main feature of the application is the setting of training programs by user. So you don't need special equipment or physical level, programs will adapt for your data. Application analyzes heart rate during the exercises to correct load, the best works on running. The application is constantly evolving and is becoming more functional and better.

Customer: NDA

Involvement Duration: 11.2021-01.2022

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic;
• Improving application performance;
• Integration In-App purchases;
• Publishing to Play Market / AppStore to production.

Project Team Size: 8 team members

Tools & Technologies: React Native (0.63), JavaScript, Functionality programing (hooks), GraphQL, Sentry, MoEngage, MixPanel (tracking user actions), In app purchases, Asana.

Project Description: Application was created for managers, to manage the products of the company, customers, etc. Prefer to android platform with ios support and tablet adaptation.

Customer: NDA

Involvement Duration: 12.2019-11.2021

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic;
• Integration background gps tracking.

Project Team Size: 10 team members

Tools & Technologies: React Native (0.60), JavaScript, Redux, Bitbucket, Jira Software, Sentry, REST API.

Project Description: Mobile application for the Android and iOS platforms, which allows you to calculate the money and time spent on the development of any project.

Customer: NDA

Involvement Duration: 08.2019-12.2019

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic;
• Creation of project architecture.

Project Team Size: 7 team members

Tools & Technologies: React Native,JavaScript, Redux, Redux-Saga, REST API, Bitbucket.

Project Description: Mobile project (adaptive to android and ios) for business school in Italy. It's an internal social network. Project includes: authorization(JWT token), list news, forums, chats, community.

Customer: NDA

Involvement Duration: 11.2018-08.2019

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic;
• Creation of project architecture for mobile and back-end side (Firebase);
• Publishing to Play Market / AppStore to production.

Project Team Size: 12 team members

Tools & Technologies: React Native (React Native CLI) , JavaScript, Redux/Redux-saga , Document/Image picker, React-navigation, Firebase, BitBucket, Apollo server (on firebase cloud).

Project Description: Mobile project (adaptive to android and ios) for local hookah.

Customer: NDA

Involvement Duration: 07.2018-11.2018

Project Role: *React Native Developer*

Responsibilities:
• Development of UI and business logic (supporting project).

Project Team Size: 5 team members

Tools & Technologies: React Native (React Native CLI), JavaScript (ES6), ReduxFirebase, BitBucket.
