OREST

PYTHON DEVELOPER

SKILLS

- **Telegram-related skills** (Telegram API (Telethon), Telegram Bot API (Aiogram, Telebot))
- **DB Management** (PostgreSQL, SQL, SQLAlchemy)
- **Async programming** (Asyncio, Aiohttp)
- **Backend Development** (FastAPI, Flask, Django, Pydantic)
- **Scraping tools (Selenium,** BS4, Requests, Apify, Pillow)
- **DevOps Tools** (Docker, AWS EC2, CI/CD)
- **Other** (OpenAI-related libraries)

LANGUAGES

- English: Upper-intermediate
- Ukrainian: Fluent

PROFILE

Orest is a dynamic and accomplished Python developer with an impressive track record of three years in diverse, cutting-edge technologies. His versatile expertise extends across various domains, highlighting his remarkable aptitude for adapting and excelling in any technical landscape.

WORK EXPERIENCE

Python developer
2024 - PRESENT

Yoga community management bot

- In this project, our system manages user registrations and training posts. For registration, it receives messages from Kajabi, records users, and sends group links after bot interaction. For training, the bot gathers info, posts videos to groups, and uploads them to Google Drive. I've led this ongoing project and provided support for over a year.

Tech stack: Telethon, Aiogram3, integration with Google Drive/docs, integration with Gohighlevel, Kajabi

Python lead developer
2023 - 2024

The Real Estate Data for the UK Market ETL project

The Real Estate Data for the UK Market ETL project focused on gathering comprehensive data about the real estate market in the United Kingdom, creating a custom database, and integrating it with a Google Chrome extension. The primary challenge was ensuring fast database response times, as the database exceeded 50GB in size. This challenge was successfully addressed, achieving the required performance.

Tech stack: Requests, SQL-based databases, SQLAlchemy, FastAPI.

EDUCATION

Master's degree in LAW of Business
2014

Ivan Franko National University Lviv

Python developer cources
2022

WORK EXPERIENCE

Python developer
2022 - 2023

The Parts Catalog Scraping ETL Project

The Parts Catalog Scraping ETL Project involved building a database by scraping a massive amount of big data. The project included integration with the Apify service, utilizing various technologies for data parsing and retrieval. I am the team lead on this project.

Tech stack: Scraping tools (Selenium, BS4, Requests, Apify, Aiohttp) +Apify

Python developer
2022 - 2023

Yumzle

The QR Choice Similar Project involved refactoring the existing code from a previous developer, migrating the backend from PHP to Python. Additionally, the project included frontend refactoring, which involved replacing all existing frontend code with new code, integrating it with new backend API endpoints, and implementing new login and registration logic using Auth0

Tech stack: Requests, SQL-based databases, SQLAlchemy, FastAPI.
